

findVowels

Instruction:

- Write a JavaScript function named **findVowels** to search for the vowels ['a', 'e', 'i', 'o', 'u'] and determine their positions. It takes a string **word** and returns an object showing the vowels present and their positions in the string.

Initiate code:

// Insert your code here

```
console.log(findVowels("Heleelaeiouo"));
```

Output:

```
{
  e: [ '1', '3', '4', '7' ],
  a: [ '6' ],
  i: [ '8' ],
  o: [ '9', '11' ],
  u: [ '10' ]
}
```
